Turn Transparency Data into Competitor Intelligence

You have unprecedented access to provider reimbursement data. Are you making the most of this opportunity?

MRF data is extremely large and complex.

Our Price Transparency Analytics solution will help you turn the data into easy-to-understand competitor intelligence so you can see exactly where you stand compared to other health plans.

Intrigued about how we make it happen?

Keep reading.

Our Approach

Unpacking MRF Data to Give You Comprehensive Insights

1 Successful Data Normalization & Enrichment

- Creation of a consistent data layer for analysis
- Linking provider data to the right group practices and health systems
- Adding in additional data sets such as COB and provider transparency data

2 Creation of Powerful Reports and Analyses

- A reporting package showing competitor network fee schedules
- Access to source MRF data allowing for exploration of all reimbursement types
- Reports including both Medicare and client's reimbursement levels

3 Expertise & Partnership

Your market expertise + Certilytics experience with healthcare data processing and provider reimbursement will be incorporated into your analysis and give you the powerful intelligence you need
